### PROFILE SUMMARY

- ⦿ **Result-oriented, techno-commercial, Seasoned professional, offering 25 years of rich experience in Plant Engineering, Operation & Maintenance, Utilities, Engineering, Project Management (three Green Field Projects), EHS, Statutory compliances, Government Permissions, Instrumentation & Control, Installation & Commissioning, Facility Management.**
- ⦿ **Experience of Setting up, Maintenance & Utility of Continuous Process Industry, Engine Manufacturing Industry, Textile, Chemical Industry, Auto Industry, Heavy Equipment Manufacturing Industry**
- ⦿ **Proficiency in Operation & Maintenance of Utility (132KV & 33KV Substation, Boilers, Thermic Fluid heater, Water Treatment Plant, Pollution Control Equipment, Compressor, N2 Plant, Chillers, Dryers, HVAC, Colling Towers, Dryers, DG Set, Fire Protection System, Solvent recovery, Cleanroom, Coldroom)**
- ⦿ **Spearheaded Plant Engineering Department.** Administered overall Factory Maintenance (Mechanical, Electrical, Instrumentation, Civil) Utility, Project, Facility Management, EHS, Statutory compliances & Government liaison, Budgeting – Capex & Revenue/period
- ⦿ **Team Management** – Managed team of size of 86 nos employees
- ⦿ **Knowledge & maintenance of all types of controls equipments, principal & logic** – Electrtronic, Mechanical, Pneumatic, Hydraulic, PLC, SCADA
- ⦿ **Exhibits a strong and firm approach for sustaining / encouraging safe work environment to streamline operations and applies continuous improvement principles to increase process and maintenance efficiency and company profits**
- ⦿ **Track record of implementing cost saving measures to achieve substantial reduction in terms of raw materials, manpower and machine utilization**
- ⦿ **Enterprising leader with excellent communication and people management skills for leading personnel towards accomplishment of common goals**
- ⦿ **Proven track record of turning-around under-performing projects and completing them within schedule by identifying bottlenecks**
- ⦿ **Knowledge & implementation of System & process - Lean Manufacturing, TPM, 5S, ISO9001, EMS ISO14001, OHSAS ISO18001, TS, SAP, MTBF, MTTR, Energy Management, Industry 4.0, Kaizen, QMS**
- ⦿ **Statutory Compliances, Government Permissions, Government Liasoning, Incentive for New Industry Setup & running Industry**

### CORE COMPETENCIES

| Operation & Maintenance          | Continuous Process Maintenance | Textile Industry           | Chemical Industry      |
|----------------------------------|--------------------------------|----------------------------|------------------------|
| Installation & Commisioning      | Engine Test Cell               | Polymerisation Maintenance | Store Management       |
| Utilities                        | Engine Assembly                | EHS Mangement              | Spare Parts Management |
| Green Field Project              | Machine Shop                   | Instrumentation & Controls | Fabrication Shop       |
| Statutory Compliances            | Paint Shop                     | Boilers – Coal & Diesel    | Civil, MEPF, Layout    |
| Mechanical, Electrical, Plumbing | Vehicle Assembly               | 132KV & 33KV Sub Stations  | Facility Management    |

### SOFT SKILL

### EDUCATION

- ⦿ Post Graduate Program in Management Exe MBA/ Management Development Program from Welinkar Institute of Management in 2011 – 71%
- ⦿ B.E. in Electrical Engineering from Pallavan College of Engineering–69.4%
- ⦿ Diploma in Maintenance Engineering & Management from Annamalai University, TN Tamil Nadu Board of Tech Education – 50.7%
- ⦿ Diploma in Electrical Engineering from Govt. Polytechnic, – 77.1%
